

To Whom It May Concern,

On behalf of Meniga Poland sp. z o.o., I would like to express our appreciation for the collaboration with Kamil Kiełbasa in delivering the upskilling program "A Journey to Collaborative Software Design" for our engineering department.

Kamil's deep expertise, passion, and dedication made a significant impact on our teams, equipping them with advanced knowledge and practical skills to enhance our software design processes. His ability to translate complex concepts into real-world applications was particularly valuable, helping our developers understand how to effectively apply Domain-Driven Design (DDD) principles in our projects.

Throughout the program, Kamil provided invaluable insights into modern collaborative design techniques, guiding our teams through structured workshops and practical exercises. The covered topics included:

- Introduction to Collaborative Analysis and Design
- Event Storming Big Picture Workshop
- Domain Storytelling Workshop
- Event Storming Process Level Workshop
- Strategic Domain-Driven Design
- Tactical Domain-Driven Design
- Advanced patterns such as Event Sourcing, Decider Patterns, and Large-Scale Structures

His structured approach and engaging facilitation style ensured that participants not only grasped theoretical concepts but also gained hands-on experience that they could directly apply in their daily work.

It is our pleasure to highly recommend Kamil Kiełbasa as a professional trainer who delivers high-quality, impactful training programs.

Sincerely,

Marzena Wiecko
